

Team Name: CookieHour

Mark Breakdown:

Component	0	1	2	3	4
Reasonable scoping decisions with credible area of focus and reasonable decisions to omit use cases.				✓	
Clearly explain how and why you propose to slice the system into webapps					✓
Reasonable choice of middleware with clear explanation of team's rationale					✓
Reasonable choice of APIs with clear explanation of rational		✓			
Test strategy				✓	
End-to-end vertical slice					✓
Front-end bad input field edit unit test					✓
Back-end Api unit test					✓

4	100%	Outstanding
3	85%	Good, meeting all expectations
2	70%	OK, but some expectations were not fully met
1	50%	Below expectations
0	0%	Missing (or extremely low quality) work

Total: 90%

Notes:

- **Scope.md:** Good choices of use cases! It's also great that you prioritized them. However, I would have liked to have seen more justifications overall (ex: why have you included/omitted the use cases that you have? How do your learning goals relate to these chosen use cases?).

- **Arch.md:** I like that you've separated the Calendar service. Is the calendar service also for students? I would also rename your database service since it is not a very descriptive (Management service? Scheduling service?).
- **Api.md:** You only have the login functionality implemented. What about your other use cases? What about your calendar service?
- **Test.md:** Good choices in testing frameworks. What parts of the front end web-apps and services will you be testing (Functionality? Usability? Interfaces?) or, how will you be using these frameworks to test your application?
