Meeting 1

Date: Feb 15, 2019

Agenda: Work on P1

Present: Temisan, Kyra, Adam, Hatem, Timothy, Simon

Discussion on Scope.md:

Learning goals:

- Frontend: React
- Backend : firebase/mongodb,javascript
- Stack: MERN stack

Workflow:

- Working on branches / forking
- pull requests to merge to master
- master is a working version of the app (bug free as much as possible)

Note: Instructor wants at least 2 different endpoints for the project.

Summary of meeting:
- Went through the use cases to decide which were our priority (our subset)
- Decided that everyone should come up with something they want to learn themselves and we'll collectively combine them for our learning goals
- Got our team git repo setup
