Team Name: CookieHour

Mark Breakdown:

Component	0	1	2	3	4
Demo					✓
Technical Product Report				✓	

4	100%	Outstanding
3	85%	Good, meeting all expectations
2	70%	OK, but some expectations were not fully met
1	50%	Below expectations
0	0%	Missing (or extremely low quality) work

Total: 92.5%

Notes:

- **presentation:** Great presentation! You guys are clearly very organized (great job using Trello), and gave us a great walkthrough of what you've done, how you did it, and what you will be doing for the future. Nice looking UI. Good idea to show us the backend functionality that hasn't yet made it to the UI. Great work overall.

- **product.md:** Good documentation. You clearly described what has been built, and had an honest discussion about why certain goals haven't been reached. It was also a great idea to include a burnout chart. However, it would have been useful to have a high level diagram on how your project is organized. For example, there was an original plan to have a calendar integration service. Did this change from P1 (it is not mentioned in this document, except maybe inferred in your instructor use cases)? If not, it should have been mentioned in the "High-level Design" portion of your document.
